Biology By Robert J. Brooker Professor Dr., Eric P. Widmaier Dr., Linda Graham Dr. Ph.D., Peter Stiling Dr. Ph.D.

The previous three editions of *BIOLOGY*, written by **Dr. Rob Brooker, Dr. Eric Widmaier, Dr. Linda Graham, and Dr. Peter Stiling**, have reached thousands of students and provided them with an outstanding view of the biological world. Now, the fourth edition has gotten even better! The author team is dedicated to producing the most engaging and current text that is available for undergraduate students who are majoring in biology. The authors want students to be inspired by the field of biology and become critical thinkers. They understand the goal of a professor is to prepare students for future course work, lab experiences, and careers in the sciences. Building on the successes of the previous editions, the fourth edition reflects a focus on core competencies and provides a more learner-centered approach. The strength of an engaging and current text is improved with the addition of new pedagogical features that help develop and strengthen critical thinking skills.

Editorial Review

About the Author

Linda Graham is Professor of Botany and Environmental Studies at the University of Wisconsin-Madison.

She received her Ph.D. in Botany from the University of Michigan, Ann Arbor. She has taught a nonmajors plant biology course each year for more than 20 years. She also teaches courses on the biology of algae and bryophytes, contributes to an introductory biology course for majors, and has taught marine botany on a remote tropical island.

Eric P. Widmaier received his Ph.D. in 1984 in Endocrinology from the University of California at San Francisco. His postdoctoral training was in endocrinology and physiology at the Worcester Foundation for Experimental Biology, and The Salk Institute in La Jolla, CA. He is currently Professor of Biology at Boston University.

Peter Stiling is a professor of biology at the University of South Florida at Tampa. He has taught classes in ecology, environmental science, and community ecology, and in 1995 he received a teaching award in recognition of classroom excellence in these areas. Dr. Stiling obtained his Ph.D. from University College, Cardiff, Wales, and completed postdoctoral research at Florida State University.

Rob Brooker (Ph.D., Yale University) received his B.A. in biology at Wittenberg University, Springfield, Ohio, in 1978. At Harvard, he studied lactose permease, the product of the lacY gene of the lac operon. He continues working on transporters at the University of Minnesota, where he is a Professor in the Department of Genetics, Cell Biology, and Development and has an active research laboratory. At the University of Minnesota, Dr. Brooker teaches undergraduate courses in biology, genetics, and cell biology. In addition to many other publications, he has written two undergraduate genetics texts published by McGraw-Hill: Genetics: Analysis & Principles, 4th edition, copyright 2012, and Concepts of Genetics, copyright 2012.

Users Review

From reader reviews:

Josephine Lowe:

Have you spare time for the day? What do you do when you have considerably more or little spare time? Yeah, you can choose the suitable activity with regard to spend your time. Any person spent all their spare time to take a go walking, shopping, or went to the Mall. How about open as well as read a book titled Biology? Maybe it is to get best activity for you. You already know beside you can spend your time along with your favorite's book, you can better than before. Do you agree with its opinion or you have some other opinion?

Virginia Benson:

The book Biology can give more knowledge and information about everything you want. Why must we leave the great thing like a book Biology? A few of you have a different opinion about guide. But one aim which book can give many data for us. It is absolutely suitable. Right now, try to closer with your book.

Knowledge or information that you take for that, it is possible to give for each other; it is possible to share all of these. Book Biology has simple shape however, you know: it has great and big function for you. You can appear the enormous world by open and read a guide. So it is very wonderful.

Jerry Montgomery:

This Biology are reliable for you who want to certainly be a successful person, why. The main reason of this Biology can be among the great books you must have will be giving you more than just simple studying food but feed you actually with information that probably will shock your earlier knowledge. This book is handy, you can bring it everywhere and whenever your conditions in e-book and printed types. Beside that this Biology forcing you to have an enormous of experience including rich vocabulary, giving you demo of critical thinking that we realize it useful in your day activity. So , let's have it and revel in reading.

Nancy Barry:

Do you like reading a guide? Confuse to looking for your best book? Or your book has been rare? Why so many query for the book? But any kind of people feel that they enjoy regarding reading. Some people likes reading, not only science book but also novel and Biology or others sources were given understanding for you. After you know how the truly great a book, you feel desire to read more and more. Science reserve was created for teacher as well as students especially. Those guides are helping them to increase their knowledge. In different case, beside science guide, any other book likes Biology to make your spare time considerably more colorful. Many types of book like this.
