**Blood Cells An Atlas of Morphology with Clinical Relevance** By Gene Gulati and Jaime Caro

Dr Gene L. Gulati, world-renowned educator and frequent contributor to Laboratory Medicine and other prestigious scientific journals, along with his colleague Dr. Jaime Caro, have brought together a comprehensive and completely practical color atlas of the characteristics and clinical relevance of individual normal and abnormal cells, and the morphologic findings associated with various clinical conditions. Hundreds of microphotographs and concise, clear definitions are included to aid in the differentiation of blood smears so critical in clarifying or establishing diagnoses in the clinical laboratory. You're sure to benefit from the unique perspectives and combined expertise of a clinical laboratory hematologist and a clinical hematologist. Succinct descriptions are provided for nearly all blood smear findings that a hematology practitioner may encounter in daily practice. In fact, the comprehensive collection of high-quality microphotographs reproduced in this outstanding atlas are actually those encountered by the authors in their lifetime of daily practice in hematology. With 1170 images and 19 tables.
