## **Fire Protection Systems** By A. Maurice Jones

A practical understanding of fire protection systems is essential to effective management of a fire scene. Fire Protection Systems focuses on the operational characteristics and abilities of different types of systems and equipment that are used during fire department operations to access a water source, apply a suppression agent to control a particular type of fire, provide information concerning the location of a fire, and more. Systematic, easy-to-understand coverage thoroughly explores various types of active fire protection systems and components, how they operate, and the requirements for installation, making this a valuable learning tool for firefighters and a handy resource for design professionals.
