## **Editorial Review**

From Publishers Weekly

Industrial nations that favor economic growth over ecological consciousness led Cobb and Daly to devise these counteractive plans. PW called this ``a detailed, far-reaching blueprint for a highly decentralized economy. . . . The authors' important, radical critique of contemporary economic thinking in the book's dry first half leads to specific proposals in the second."

Copyright 1991 Cahners Business Information, Inc.

From Library Journal

This book is a profound critique of conventional economic theories and policies. Daly (economics, Louisiana State Univ.), an economist at the World Bank, and Cobb (theology and philosophy, Claremont Graduate Sch., Cal.) provide an alternative approach to economics, one that is more humanistic and less scientific. Their criticisms are rooted in a religious/philosophical framework of stewardship and community. The idealistic policies that flow from this new approach will be controversial. This book is highly recommended, especially for college libraries. Few other volumes address these issues with such insight.
