Identifying Marine Diatoms and Dinoflagellates By Grethe R. Hasle, Erik E. Syvertsen, Karen A. Steidinger, Karl Tangen, Carmelo R. Tomas

Identifying Marine Diatoms and Dinoflagellates is the second identification manual created from the literature developed for the Advanced International Phytoplankton Course. This version, enlarged and modified from the earlier literature, deals with the identification of marine diatoms and dinoflagellates. The data and references presented here should allow the researcher to pursue the question of valid species and how they can be verified.

This volume comprises three chapters, beginning with an introductory chapter discussing the subject's historical background. The next chapter focuses on marine diatoms, providing an introduction that describes their general characteristics, life cycles, morphology and terminology, and classification. It is followed by a discussion of genera represented in marine plankton, a description of taxa, and methodology. The third and final chapter focuses on dinoflagellates, beginning with an introduction that describes their general characteristics and eukaryotic unicells. The discussion continues with terminology and morphology, identification of species, techniques for preparation of dinoflagellates for identification, common dinoflagellate synonyms, and an index of dinoflagellate taxa.

This book will be of interest to practitioners in the fields of biology, zoology, and environmental protection.

Editorial Review

Users Review

From reader reviews:

Oliver Gerling:

As people who live in typically the modest era should be upgrade about what going on or details even knowledge to make these people keep up with the era which can be always change and advance. Some of you maybe will probably update themselves by studying books. It is a good choice for you personally but the problems coming to a person is you don't know what type you should start with. This Identifying Marine Diatoms and Dinoflagellates is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and need in this era.

Sena Meyer:

Typically the book Identifying Marine Diatoms and Dinoflagellates has a lot of knowledge on it. So when you read this book you can get a lot of benefit. The book was published by the very famous author. This articles author makes some research prior to write this book. This particular book very easy to read you can get the point easily after looking over this book.

Nathaniel Mitchell:

People live in this new day of lifestyle always try to and must have the spare time or they will get large amount of stress from both way of life and work. So , whenever we ask do people have spare time, we will say absolutely indeed. People is human not really a robot. Then we request again, what kind of activity are you experiencing when the spare time coming to a person of course your answer will certainly unlimited right. Then do you ever try this one, reading publications. It can be your alternative throughout spending your spare time, the actual book you have read will be Identifying Marine Diatoms and Dinoflagellates.

Tara Reynolds:

Your reading sixth sense will not betray you actually, why because this Identifying Marine Diatoms and Dinoflagellates guide written by well-known writer whose to say well how to make book which might be understand by anyone who all read the book. Written with good manner for you, still dripping wet every ideas and composing skill only for eliminate your hunger then you still hesitation Identifying Marine Diatoms and Dinoflagellates as good book not simply by the cover but also from the content. This is one book that can break don't determine book by its deal with, so do you still needing yet another sixth sense to pick this!? Oh come on your reading sixth sense already alerted you so why you have to listening to another sixth sense.
