Divine Wind: The History and Science of Hurricanes By Kerry Emanuel

Imagine standing at the center of a Roman coliseum that is 20 miles across, with walls that soar 10 miles into the sky, towering walls with cascades of ice crystals falling along its brilliantly white surface. That's what it's like to stand in the eye of a hurricane. In *Divine Wind*, Kerry Emanuel, one of the world's leading authorities on hurricanes, gives us an engaging account of these awe-inspiring meteorological events, revealing how hurricanes and typhoons have literally altered human history, thwarting military incursions and changing the course of explorations. Offering an account of the physics of the tropical atmosphere, the author explains how such benign climates give rise to the most powerful storms in the world and tells what modern science has learned about them.

Interwoven with this scientific account are descriptions of some of the most important hurricanes in history and relevant works of art and literature. For instance, he describes the 17th-century hurricane that likely inspired Shakespeare's *The Tempest* and that led to the British colonization of Bermuda. We also listen about the Galveston Hurricane of 1900, by far the worst natural calamity in U.S. history, with a death toll between 8,000 and 12,000 that exceeded the San Francisco earthquake, the Johnstown Flood, and the Okeechobee Hurricane. *Divine Wind* captures the profound effects that hurricanes have had on humanity. It's fascinating blend of history, science, and art will appeal to weather junkies, science buffs, and everyone who read Isaac's *Storm*.

Editorial Review

From [Booklist](#)

Named for the evil Caribbean deity Huracan, hurricanes are presented in verse, art, history, and science in this well-designed album by MIT professor Emanuel. His discussions encompass hurricane formation and dissolution, the uncertainty in predicting a storm's behavior, digressions into historical catastrophes, and the risk inherent in building along tropical coastlines. With exceptionally clear prose, Emanuel explains the atmospheric forces that restrict hurricanes to tropical latitudes and upends popular misconceptions about their frequency, noting that "the problem for research scientists is not why hurricanes develop, but why they hardly happen." Noting the genesis of many Atlantic hurricanes in easterly waves flowing off the Sahara Desert, Emanuel delves into the array of physical factors that impinge on the strength and direction of a tempest, points reinforced by a wealth of diagrams, satellite imagery, and a majestic photo-essay about flying into a hurricane. The science is reinforced by evocative artwork of storm-tossed ships and ravaged landscapes. A gripping popular treatment of peril, that will have great resonance in light of recent disasters.

Review

"Emanuel's work, inspired by these terrible storms, reaches a different, and thrilling, level of art." -- *Plain Dealer*, Karen Long, September 11, 2005

About the Author

Kerry Emanuel is Professor of Atmospheric Science in the Department of Earth, Atmospheric, and Planetary Science at MIT. He is the author of "Divine Wind: The History and Science of Hurricanes and Atmospheric Convection." In May 2006 he was named one of Time magazine's "Time 100: The People Who Shape Our World." A Republican, he has made it clear that he disagrees with his party on climate change.

Users Review

From reader reviews:

John Frank:

This Divine Wind: The History and Science of Hurricanes are usually reliable for you who want to be considered a successful person, why. The main reason of this Divine Wind: The History and Science of Hurricanes can be one of many great books you must have is actually giving you more than just simple looking at food but feed a person with information that maybe will shock your before knowledge. This book is usually handy, you can bring it everywhere and whenever your conditions throughout the e-book and printed versions. Beside that this Divine Wind: The History and Science of Hurricanes giving you an enormous of experience for example rich vocabulary, giving you trial of critical thinking that we realize it useful in your day pastime. So , let's have it and revel in reading.

Mary Hopkins:

In this period globalization it is important to someone to find information. The information will make anyone

to understand the condition of the world. The healthiness of the world makes the information simpler to share. You can find a lot of recommendations to get information example: internet, paper, book, and soon. You can observe that now, a lot of publisher which print many kinds of book. The particular book that recommended to you personally is Divine Wind: The History and Science of Hurricanes this book consist a lot of the information in the condition of this world now. That book was represented just how can the world has grown up. The vocabulary styles that writer value to explain it is easy to understand. The writer made some research when he makes this book. That is why this book acceptable all of you.

Faye Bolin:

As we know that book is significant thing to add our understanding for everything. By a reserve we can know everything we want. A book is a list of written, printed, illustrated or maybe blank sheet. Every year seemed to be exactly added. This guide Divine Wind: The History and Science of Hurricanes was filled about science. Spend your time to add your knowledge about your scientific disciplines competence. Some people has different feel when they reading some sort of book. If you know how big benefit of a book, you can feel enjoy to read a reserve. In the modern era like now, many ways to get book you wanted.

Delaine Valencia:

What is your hobby? Have you heard that question when you got learners? We believe that that concern was given by teacher for their students. Many kinds of hobby, Every individual has different hobby. And also you know that little person like reading or as studying become their hobby. You have to know that reading is very important in addition to book as to be the thing. Book is important thing to provide you knowledge, except your current teacher or lecturer. You find good news or update concerning something by book. Many kinds of books that can you take to be your object. One of them is this Divine Wind: The History and Science of Hurricanes.
