**Human Molecular Genetics, Fourth Edition** By Tom Strachan, Andrew Read

*Human Molecular Genetics* is an established and class-proven textbook for upper-level undergraduates and graduate students which provides an authoritative and integrated approach to the molecular aspects of human genetics. While maintaining the hallmark features of previous editions, the Fourth Edition has been completely updated. It includes new Key Concepts at the beginning of each chapter and annotated further reading at the conclusion of each chapter, to help readers navigate the wealth of information in this subject.

The text has been restructured so genomic technologies are integrated throughout, and next generation sequencing is included. Genetic testing, screening, approaches to therapy, personalized medicine, and disease models have been brought together in one section. Coverage of cell biology including stem cells and cell therapy, studying gene function and structure, comparative genomics, model organisms, noncoding RNAs and their functions, and epigenetics have all been expanded.

## **Editorial Review**

### **Review**

Praise for the Third Edition:

"This book is an excellent companion for students in human genetics or for researchers that want to gain background and knowledge in this field." *Human Genetics Journal*

"[*Human Genetics*] is a well-crafted piece that will entertain and educate interested readers....Lewis uses vibrant language and insightful allegories to explain difficult scientific concepts....It is certainly an up-to-date account of this quickly evolving field." *Quarterly Review of Biology*

### **About the Author**

Tom Strachan is Scientific Director of the Institute of Human Genetics and Professor of Human Molecular Genetics at Newcastle University, UK, and is a Fellow of the Academy of Medical Sciences and a Fellow of the Royal Society of Edinburgh. Tom's early research interests were in multigene family evolution and interlocus sequence exchange, notably in the HLA and 21-hydroxylase gene clusters. While pursuing the latter, he became interested in medical genetics and disorders of development. His most recent research has focused on developmental control of the vertebrate cohesion regulators Nipbl and Mau-2.

Andrew Read is Emeritus Professor of Human Genetics at the University of Manchester, UK and a Fellow of the Academy of Medical Sciences. Andrew has been particularly concerned with making the benefits of DNA technology available to people with genetic problems. He established one of the first DNA diagnostic laboratories in the UK over 20 years ago (it is now one of two National Genetics Reference Laboratories), and was founder chairman of the British Society for Human Genetics, the main professional body in this area. His own research is on the molecular pathology of various hereditary syndromes, especially hereditary hearing loss.

Drs. Strachan and Read were recipients of the European Society of Human Genetics Education Award.

## **Users Review**

### **From reader reviews:**

#### **Hattie Jasso:**

What do you consider book? It is just for students as they are still students or this for all people in the world, the particular best subject for that? Merely you can be answered for that problem above. Every person has different personality and hobby for every single other. Don't to be pressured someone or something that they don't would like do that. You must know how great along with important the book Human Molecular Genetics, Fourth Edition. All type of book can you see on many solutions. You can look for the internet

options or other social media.

**Tina Olsen:**

Now a day folks who Living in the era wherever everything reachable by match the internet and the resources inside can be true or not demand people to be aware of each facts they get. How a lot more to be smart in having any information nowadays? Of course the reply is reading a book. Looking at a book can help folks out of this uncertainty Information particularly this Human Molecular Genetics, Fourth Edition book since this book offers you rich data and knowledge. Of course the information in this book hundred per-cent guarantees there is no doubt in it you probably know this.

**Enrique Boggs:**

Hey guys, do you desires to finds a new book to study? May be the book with the subject Human Molecular Genetics, Fourth Edition suitable to you? The actual book was written by well known writer in this era. The particular book untitled Human Molecular Genetics, Fourth Edition is one of several books which everyone read now. This specific book was inspired many people in the world. When you read this book you will enter the new way of measuring that you ever know before. The author explained their idea in the simple way, consequently all of people can easily to recognise the core of this book. This book will give you a great deal of information about this world now. To help you to see the represented of the world on this book.

**David Saenz:**

This Human Molecular Genetics, Fourth Edition is great e-book for you because the content that is full of information for you who else always deal with world and possess to make decision every minute. This specific book reveal it info accurately using great manage word or we can declare no rambling sentences inside. So if you are read the idea hurriedly you can have whole details in it. Doesn't mean it only provides straight forward sentences but hard core information with wonderful delivering sentences. Having Human Molecular Genetics, Fourth Edition in your hand like obtaining the world in your arm, details in it is not ridiculous 1. We can say that no guide that offer you world in ten or fifteen tiny right but this reserve already do that. So , this really is good reading book. Hello Mr. and Mrs. active do you still doubt that will?
