Why We Believe in God(s): A Concise Guide to the Science of Faith By J. Anderson Thomson, Clare Aukofer

In this groundbreaking volume, J. Anderson Thomson, Jr., MD, with Clare Aukofer, offers a succinct yet comprehensive study of how and why the human mind generates religious belief. Dr. Thomson, a highly respected practicing psychiatrist with credentials in forensic psychiatry and evolutionary psychology, methodically investigates the components and causes of religious belief in the same way any scientist would investigate the movement of astronomical bodies or the evolution of life over time—that is, as a purely natural phenomenon. Providing compelling evidence from psychology, the cognitive neurosciences, and related fields, he, with Ms. Aukofer, presents an easily accessible and exceptionally convincing case that god(s) were created by man—not vice versa. With this slim volume, Dr. Thomson establishes himself as a must-read thinker and leading voice on the primacy of reason and science over superstition and religion.

Editorial Review

Review

"This book about the evolutionary drivers of religiosity would have delighted [Darwin].... One by one the components of religion receive the Thomson treatment. Every point he makes has the ring of truth, abetted by a crisp style and vivid imagery. Andy Thomson is an outstandingly persuasive lecturer, and it shines through his writing. This short, punchy book will be swiftly read—and long remembered."

—Richard Dawkins, author of *The God Delusion*, from the foreword of *Why We Believe in God(s)*

Users Review

From reader reviews:

Edith Ward:
