Editorial Review

About the Author

For two decades, Cecie Starr secured her place as one of the bestselling biology textbook authors. Her texts, appreciated for their clarity in both the written word and the visual representation of biological concepts, include multiple editions of **BIOLOGY: THE UNITY AND DIVERSITY OF LIFE**, **BIOLOGY: CONCEPTS AND APPLICATIONS**, and **BIOLOGY TODAY AND TOMORROW**. Her original dream was to become an architect, but now, instead of building houses, she builds -- with care and attention to detail -- incredible texts based on this philosophy: "I invite students into a chapter through an intriguing story. Once inside, they get the great windows that biologists construct on the world of life. Biology is not just another house. It is a conceptual mansion. I hope to do it justice."

Christine Evers (B.S. in Biology, State University of New York at Stony Brook) has been creating multimedia and web-based materials to supplement Starr and other science texts for ten years. After working as a research assistant studying developmental biology of slime mold, she was awarded an N.S.F. fellowship to attend Yale, where she studied Evolutionary Biology and honeybee behavior. She has a strong interest in science education and serves as a member of her local school board.

Lisa Starr (B.A. in Chemistry/Biochemistry, University of California at San Diego, Revelle College) became an expert in molecular and cellular biology as she helped to build a veterinary virology research program at the biotech firm Syntro. She also spent seven years at The Scripps Research Institute and founded two other biotech firms. Since 1997, Lisa has been responsible for much of the art in the Starr **BIOLOGY** textbooks and has been a coauthor of the series since 2004.

Users Review

From reader reviews:

Tara Gamboa:

This book untitled **Biology Today and Tomorrow without Physiology** to be one of several books this best seller in this year, that's because when you read this reserve you can get a lot of benefit on it. You will easily to buy that book in the book retail outlet or you can order it via online. The publisher in this book sells the e-book too. It makes you more easily to read this book, because you can read this book in your Smart phone. So there is no reason to you personally to past this guide from your list.

Dolores Mika:

The guide untitled **Biology Today and Tomorrow without Physiology** is the publication that recommended to you you just read. You can see the quality of the publication content that will be shown to you. The language that article author use to explained their ideas are easily to understand. The copy writer was did a lot of research when write the book, to ensure the information that they share to you is absolutely accurate.
