Factorization of Linear Operators and Geometry of Banach Spaces (Cbms Regional Conference Series in Mathematics) By Gilles Pisier

This book surveys the considerable progress made in Banach space theory as a result of Grothendieck's fundamental paper *Resume de la theorie metrique des produits tensoriels topologiques*. The author examines the central question of which Banach spaces $\$X\$$ and $\$Y\$$ have the property that every bounded operator from $\$X\$$ to $\$Y\$$ factors through a Hilbert space, in particular when the operators are defined on a Banach lattice, a $\$C^*$ -algebra or the disc algebra and $\$H^\infty\$$. He reviews the six problems posed at the end of Grothendieck's paper, which have now all been solved (except perhaps the exact value of Grothendieck's constant), and includes the various results which led to their solution. The last chapter contains the author's construction of several Banach spaces such that the injective and projective tensor products coincide; this gives a negative solution to Grothendieck's sixth problem. Although the book is aimed at mathematicians working in functional analysis, harmonic analysis and operator algebras, its detailed and self-contained treatment makes the material accessible to nonspecialists with a grounding in basic functional analysis. In fact, the author is particularly concerned to develop very recent results in the geometry of Banach spaces in a form that emphasizes how they may be applied in other fields, such as harmonic analysis and $\$C^*$ -algebras.

Editorial Review

Users Review

From reader reviews:

Nancy Mitchell:

Have you spare time for a day? What do you do when you have a lot more or little spare time? Yes, you can choose the suitable activity regarding spend your time. Any person spent their spare time to take a wander, shopping, or went to often the Mall. How about open or perhaps read a book called Factorization of Linear Operators and Geometry of Banach Spaces (Cbms Regional Conference Series in Mathematics)? Maybe it is to become best activity for you. You understand beside you can spend your time along with your favorite's book, you can cleverer than before. Do you agree with it has the opinion or you have different opinion?

Calvin Fischer:

What do you about book? It is not important to you? Or just adding material when you need something to explain what you problem? How about your time? Or are you busy man or woman? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Everyone has many questions above. They must answer that question due to the fact just their can do which. It said that about e-book. Book is familiar on every person. Yes, it is appropriate. Because start from on jardín de infancia until university need this kind of Factorization of Linear Operators and Geometry of Banach Spaces (Cbms Regional Conference Series in Mathematics) to read.

Anderson Austin:

Typically the book Factorization of Linear Operators and Geometry of Banach Spaces (Cbms Regional Conference Series in Mathematics) has a lot of information on it. So when you read this book you can get a lot of gain. The book was written by the very famous author. Tom makes some research before write this book. This book very easy to read you will get the point easily after reading this book.

Robert Irizarry:

Do you like reading a book? Confuse to looking for your favorite book? Or your book ended up being rare? Why so many problem for the book? But any kind of people feel that they enjoy intended for reading. Some people likes reading through, not only science book but also novel and Factorization of Linear Operators and Geometry of Banach Spaces (Cbms Regional Conference Series in Mathematics) or perhaps others sources were given information for you. After you know how the truly amazing a book, you feel need to read more and more. Science book was created for teacher or students especially. Those ebooks are helping them to add their knowledge. In different case, beside science reserve, any other book likes Factorization of Linear

Operators and Geometry of Banach Spaces (Cbms Regional Conference Series in Mathematics) to make your spare time more colorful. Many types of book like this one.
