## **Government e-Strategic Planning and Management: Practices, Patterns and Roadmaps (Public Administration and Information Technology) From Springer**

Various e-strategies have been developed since the late '90s in an attempt to describe the governmental vision for administrative and for societal change, the objectives and priorities with regard to the development of the Information and Communication Technologies (ICT) at national and at supranational levels. Terms such as the European “Information Society”, the U.S. “Information Highways” and the Korean and Chinese “Informatization” try to describe social transformation that occurs due to the ICT, and to determine means with which governments will capitalize the ICT to improve social life and to support economic growth. This book focuses on the e-strategic management approaches that are followed worldwide, addresses the gaps that appear between e-strategic updates, and presents alternative strategic management methods adopted or to use strategic management methods as a means to describe the e-strategic evolution in their geographic areas. Each chapter evaluates e-strategic management approaches, to define multi-criteria decision-making systems for e-strategic transformation and Indicative methods for e-strategic analysis. This book also illustrates experiences from national and supranational cases, which come from different geographic areas regarding e-strategic planning and management, and demonstrates e-strategic initiation and development across different countries and continents, and the association between policies and ICT. It also seeks to perform a systematic analysis of various representative cases, in order to capture the realized e-Strategic transformation. It will be of interest to scholars and policy-makers in public administration, management, and information technology. ?

### Editorial Review

#### From the Back Cover

?Various e-strategies have been developed since the late '90s in an attempt to describe the governmental vision for administrative and for societal change, the objectives and priorities with regard to the development of the Information and Communication Technologies (ICT) at national and at supranational levels. Terms such as the European "Information Society", the U.S. "Information Highways" and the Korean and Chinese "Informatization" try to describe social transformation that occurs due to the ICT, and to determine means with which governments will capitalize the ICT to improve social life and to support economic growth.

This book focuses on the context of managing Government e-Strategies. In this order it combines strategic management issues with recent trends in forming, planning and developing Government ICT strategies. It aims to identify various e-strategic management approaches that are followed worldwide, addresses the gaps that appear between e-strategic updates, and presents alternative strategic management methods adopted or uses strategic management methods as a means to describe the e-strategic evolution in different geographic regions. In this order, this book illustrates experiences from various national and supranational cases and offers the opportunity to readers to identify and compare the association between policies and ICT.

Empirical findings from the United Arab Emirates (UAE) introduce readers to the context of this book, while part A collects chapters that address general strategic management issues in the ICT domain, such as evaluation, social involvement's assessment, location information strategies, strategic documents' analysis, effectiveness enhancement and innovation strategic management. On the other hand, part B presents various supranational, national and regional e-strategic cases and respective ICT management issues, beginning from Canada, continuing in Europe and more specifically in U.K., Spain and southern Europe; then Asian cases follow, concerning Turkey, Bangladesh, Hong Kong and Malaysia; finally, two African e-strategic cases are presented regarding Morocco and Zambia.

?Readers will gain significant outcomes and they will explore various e-strategic management issues such as evaluation, transformation, forming and planning, accompanied by methods for e-strategic analysis. It is of significant interest to scholars and policy-makers in public administration, management and information technology domains.
