**Basic Training in Mathematics: A Fitness Program for Science Students** By R. Shankar

Based on course material used by the author at Yale University, this practical text addresses the widening gap found between the mathematics required for upper-level courses in the physical sciences and the knowledge of incoming students. This superb book offers students an excellent opportunity to strengthen their mathematical skills by solving various problems in differential calculus. By covering material in its simplest form, students can look forward to a smooth entry into any course in the physical sciences.

### **Editorial Review**

#### **Review**

`Shankar obviously *enjoys* his mathematics, and his attitude toward mathematics is simultaneously refreshing and contagious....Dirac notation is intriguingly introduced in the discussion of vector spaces. Finally, the book is richly endowed with well-chosen problems.'

#### **American Journal of Physics**

`Consistent with the needs of science students...a sound mathematical reference for anyone studying or practicing in the physical sciences.'

#### **Choice**

#### **About the Author**

Ramamurti Shankar is the John Randolph Huffman Professor of Physics at Yale University, USA.

### **Users Review**

#### **From reader reviews:**

##### **John Lyons:**

Information is provisions for folks to get better life, information these days can get by anyone with everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider when those information which is inside the former life are hard to be find than now could be taking seriously which one is suitable to believe or which one often the resource are convinced. If you find the unstable resource then you have it as your main information it will have huge disadvantage for you. All of those possibilities will not happen within you if you take Basic Training in Mathematics: A Fitness Program for Science Students as the daily resource information.

##### **Cynthia Richards:**

Spent a free the perfect time to be fun activity to complete! A lot of people spent their sparettime with their family, or all their friends. Usually they accomplishing activity like watching television, going to beach, or picnic from the park. They actually doing same every week. Do you feel it? Do you wish to something different to fill your own free time/ holiday? Can be reading a book is usually option to fill your free of charge time/ holiday. The first thing that you'll ask may be what kinds of publication that you should read. If you want to try out look for book, may be the book untitled Basic Training in Mathematics: A Fitness Program for Science Students can be fine book to read. May be it could be best activity to you.

##### **Shelly Gomes:**

Do you have something that you want such as book? The book lovers usually prefer to choose book like comic, quick story and the biggest you are novel. Now, why not hoping Basic Training in Mathematics: A Fitness Program for Science Students that give your fun preference will be satisfied through reading this

book. Reading habit all over the world can be said as the method for people to know world far better than how they react toward the world. It can't be said constantly that reading routine only for the geeky particular person but for all of you who wants to always be success person. So , for every you who want to start studying as your good habit, you are able to pick Basic Training in Mathematics: A Fitness Program for Science Students become your own starter.

### **William Pare:**

In this era globalization it is important to someone to obtain information. The information will make professionals understand the condition of the world. The condition of the world makes the information better to share. You can find a lot of recommendations to get information example: internet, newspapers, book, and soon. You can view that now, a lot of publisher this print many kinds of book. The particular book that recommended to you is Basic Training in Mathematics: A Fitness Program for Science Students this publication consist a lot of the information on the condition of this world now. This particular book was represented how does the world has grown up. The dialect styles that writer use to explain it is easy to understand. The writer made some investigation when he makes this book. Honestly, that is why this book ideal all of you.
