**Fifty Challenging Problems in Probability with Solutions (Dover Books on Mathematics)** By Frederick Mosteller

Can you solve the problem of "The Unfair Subway"?

*Marvin gets off work at random times between 3 and 5 p.m. His mother lives uptown, his girlfriend downtown. He takes the first subway that comes in either direction and eats dinner with the one he is delivered to. His mother complains that he never comes to see her, but he says she has a 50-50 chance. He has had dinner with her twice in the last 20 working days. Explain.*

Marvin's adventures in probability are one of the fifty intriguing puzzles that illustrate both elementary and advanced aspects of probability, each problem designed to challenge the mathematically inclined. From "The Flippant Juror" and "The Prisoner's Dilemma" to "The Cliffhanger" and "The Clumsy Chemist," they provide an ideal supplement for all who enjoy the stimulating fun of mathematics.

Professor Frederick Mosteller, who teaches statistics at Harvard University, has chosen the problems for originality, general interest, or because they demonstrate valuable techniques. In addition, the problems are graded as to difficulty and many have considerable stature. Indeed, one has "enlivened the research lives of many excellent mathematicians." Detailed solutions are included. There is every probability you'll need at least a few of them.

### Editorial Review

#### From the Back Cover

Can you solve the problem of "The Unfair Subway"?

*Marvin gets off work at random times between 3 and 5 p.m. His mother lives uptown, his girlfriend downtown. He takes the first subway that comes in either direction and eats dinner with the one he is delivered to. His mother complains that he never comes to see her, but he says she has a 50-50 chance. He has had dinner with her twice in the last 20 working days. Explain.*

Marvin's adventures in probability are one of the fifty intriguing puzzles that illustrate both elementary and advanced aspects of probability, each problem designed to challenge the mathematically inclined. From "The Flippant Juror" and "The Prisoner's Dilemma" to "The Cliffhanger" and "The Clumsy Chemist," they provide an ideal supplement for all who enjoy the stimulating fun of mathematics.

Professor Frederick Mosteller, who teaches statistics at Harvard University, has chosen the problems for originality, general interest, or because they demonstrate valuable techniques. In addition, the problems are graded as to difficulty and many have considerable stature. Indeed, one has "enlivened the research lives of many excellent mathematicians." Detailed solutions are included. There is every probability you'll need at least a few of them.

#### About the Author

Charles Frederick Mosteller (1916–2006) was one of the eminent statisticians of the 20th century. He was the founding chairman of Harvard's Statistics department. Dr. Mosteller wrote more than 50 books and more than 350 papers, with over 200 coauthors.

#### Frederick Mosteller: Harvard Man

Frederick Mosteller (1916–2006) founded Harvard University's Department of Statistics and served as its first chairman from 1957 until 1969 and again for several years in the 1970s. He was the author or co-author of more than 350 scholarly papers and more than 50 books, including one of the most popular books in his field, first published in 1965 and reprinted by Dover in 1987, *Fifty Challenging Problems in Probability with Solutions*.

Mosteller's work was wide-ranging: He used statistical analysis of written works to prove that James Madison was the author of several of the Federalist papers whose authorship was in dispute. With then-Harvard professor and later Senator Daniel P. Moynihan, he studied what would be the most effective way of helping students from impoverished families do better in school — their answer: to improve income levels rather than to simply spend on schools. Later, his analysis of the importance to learning of smaller class sizes buttressed the Clinton Administration's initiative to hire 100,000 teachers. And, as far back as the 1940s, Mosteller composed an early statistical analysis of baseball: After his team, the Boston Red Sox, lost the 1946 World Series, he demonstrated that luck plays an enhanced role in a short series, even for a strong team.

#### In the Author's Own Words:

"Though we often hear that data can speak for themselves, their voices can be soft and sly." — Frederick Mosteller

## Users Review

### From reader reviews:

#### **Jesus Novak:**

This Fifty Challenging Problems in Probability with Solutions (Dover Books on Mathematics) book is just not ordinary book, you have it then the world is in your hands. The benefit you receive by reading this book is usually information inside this guide incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This kind of Fifty Challenging Problems in Probability with Solutions (Dover Books on Mathematics) without we know teach the one who reading it become critical in pondering and analyzing. Don't end up being worry Fifty Challenging Problems in Probability with Solutions (Dover Books on Mathematics) can bring if you are and not make your carrier space or bookshelves' become full because you can have it inside your lovely laptop even telephone. This Fifty Challenging Problems in Probability with Solutions (Dover Books on Mathematics) having fine arrangement in word as well as layout, so you will not truly feel uninterested in reading.

#### **Daniel Padilla:**

Nowadays reading books become more than want or need but also become a life style. This reading behavior give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book that will improve your knowledge and information. The details you get based on what kind of book you read, if you want have more knowledge just go with schooling books but if you want sense happy read one along with theme for entertaining such as comic or novel. The actual Fifty Challenging Problems in Probability with Solutions (Dover Books on Mathematics) is kind of book which is giving the reader unstable experience.

#### **Brooke Callender:**

Information is provisions for folks to get better life, information currently can get by anyone at everywhere. The information can be a know-how or any news even a huge concern. What people must be consider if those information which is inside former life are challenging be find than now is taking seriously which one is suitable to believe or which one the actual resource are convinced. If you have the unstable resource then you obtain it as your main information you will see huge disadvantage for you. All of those possibilities will not happen with you if you take Fifty Challenging Problems in Probability with Solutions (Dover Books on Mathematics) as your daily resource information.

#### **Karolyn Kaufman:**

A lot of people always spent all their free time to vacation or go to the outside with them friends and family or their friend. Did you know? Many a lot of people spent they will free time just watching TV, as well as playing video games all day long. If you would like try to find a new activity that is look different you can

read a new book. It is really fun for you. If you enjoy the book you read you can spent all day long to reading a reserve. The book Fifty Challenging Problems in Probability with Solutions (Dover Books on Mathematics) it is very good to read. There are a lot of folks that recommended this book. We were holding enjoying reading this book. When you did not have enough space to develop this book you can buy often the e-book. You can m0ore effortlessly to read this book from a smart phone. The price is not too expensive but this book features high quality.
