Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) By Bud Fox Ph.D., Zhang Wenzu Ph.D., Tan May Ling M.Sc.

Software Application Development: A Visual C++, MFC, and STL Tutorial provides a detailed account of the software development process using Visual C++, MFC, and STL. It covers everything from the design to the implementation of all software modules, resulting in a demonstration application prototype which may be used to efficiently represent mathematical equations, perform interactive and intuitive model-building, and conduct control engineering experiments.

All computer code is included, allowing developers to extend and reuse the software modules for their own project work. The book's tutorial-like approach empowers students and practitioners with the knowledge and skills required to perform disciplined, quality, real-world software engineering.

Editorial Review

Users Review

From reader reviews:

Fred Polak:

Nowadays reading books are more than want or need but also turn into a life style. This reading routine give you lot of advantages. Advantages you got of course the knowledge your information inside the book this improve your knowledge and information. The details you get based on what kind of reserve you read, if you want attract knowledge just go with training books but if you want experience happy read one with theme for entertaining including comic or novel. Typically the Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) is kind of guide which is giving the reader capricious experience.

Marie Forrest:

Your reading sixth sense will not betray you actually, why because this Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) book written by well-known writer whose to say well how to make book that could be understand by anyone who else read the book. Written within good manner for you, still dripping wet every ideas and publishing skill only for eliminate your current hunger then you still question Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) as good book not simply by the cover but also from the content. This is one e-book that can break don't evaluate book by its handle, so do you still needing one more sixth sense to pick this specific!? Oh come on your reading through sixth sense already alerted you so why you have to listening to yet another sixth sense.

Steven Hackett:

Many people spending their time period by playing outside along with friends, fun activity along with family or just watching TV 24 hours a day. You can have new activity to shell out your whole day by reading a book. Ugh, ya think reading a book can really hard because you have to accept the book everywhere? It all right you can have the e-book, getting everywhere you want in your Mobile phone. Like Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) which is having the e-book version. So , try out this book? Let's view.

Dena Ramirez:

As we know that book is very important thing to add our know-how for everything. By a publication we can

know everything we would like. A book is a set of written, printed, illustrated or blank sheet. Every year was exactly added. This publication Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) was filled with regards to science. Spend your extra time to add your knowledge about your technology competence. Some people has distinct feel when they reading some sort of book. If you know how big selling point of a book, you can truly feel enjoy to read a book. In the modern era like today, many ways to get book that you wanted.
