Basics of Laser Material Processing (CRC Series in Dermatology) By Grigoruants

The chapters present the problems of stresses and strains induced in metals and nonmetals in the processes of laser heating, analyze the results, offer the ways of laser treatment that dispense with subsequent machining operations, and describe the basic approaches to increase the strength of materials during laser heating. Other topics include the practical methods of implementing the processes of laser welding, cutting, hardening, alloying, and cladding (hardfacing).

Basics of Laser Material Processing is designed for scientific workers and for those students in senior- and graduate-level courses.
