National Association of Broadcasters Engineering Handbook: NAB Engineering Handbook By Graham A. Jones, David H. Layer, Thomas G. Osenkowsky

The NAB Engineering Handbook provides detailed information on virtually every aspect of the broadcast chain, from news gathering, program production and postproduction through master control and distribution links to transmission, antennas, RF propagation, cable and satellite. Hot topics covered include HD Radio, HDTV, 2 GHz broadcast auxiliary services, EAS, workflow, metadata, digital asset management, advanced video and audio compression, audio and video over IP, and Internet broadcasting. A wide range of related topics that engineers and managers need to understand are also covered, including broadcast administration, FCC practices, technical standards, security, safety, disaster planning, facility planning, project management, and engineering management.

Basic principles and the latest technologies and issues are all addressed by respected professionals with first-hand experience in the broadcast industry and manufacturing. This edition has been fully revised and updated, with 104 chapters and over 2000 pages. The Engineering Handbook provides the single most comprehensive and accessible resource available for engineers and others working in production, postproduction, networks, local stations, equipment manufacturing or any of the associated areas of radio and television.

Editorial Review

Review

A big thumper of an engineering resource is about to hit broadcast technical circles, written by a list of veritable engineering all-stars.- Radio World Online, April 2007

About the Author

Graham Jones has more than 35 years experience in the broadcast industry. With NAB he works on advanced television issues, technical standards, education and training. He is a member of both ATSC and SMPTE engineering committees. Previously he was Engineering Director for the Harris/PBS DTV Express - the educational road show that introduced DTV to many U.S. broadcasters. He started his career with the BBC in London, and has worked as a consultant to broadcasters in many parts of the world. He holds a degree in physics, is a chartered electrical engineer, and is a member of the IEE, SMPTE, SBE and the Royal Television Society. In 2004 he received the Bernard J. Lechner Outstanding Contributor Award from the Advanced Television Systems Committee.

David Layer is Director, Advanced Engineering in the Science & Technology Department of NAB, located in Washington, DC. David has been with NAB since 1995, and has been very active in the radio standards setting area. He is also involved in NAB's technical conference planning and technical publication activities, and has been an author and contributing author for numerous technical publications, including IEEE Spectrum magazine (a leading journal of the Electrical Engineering profession) and the McGraw-Hill Yearbook of Science and Technology.

Tom Osenkowsky is a Senior Member of IEEE, NARTE and SBE. He has been practicing broadcast engineering since 1976. He has designed, constructed and maintained radio broadcast facilities in the United States and Caribbean Islands, written software for engineering applications and is a frequent contributor to Radio World magazine.

Users Review

From reader reviews:

Jordan Sena:

Here thing why this particular National Association of Broadcasters Engineering Handbook: NAB Engineering Handbook are different and trustworthy to be yours. First of all looking at a book is good however it depends in the content of it which is the content is as yummy as food or not. National Association of Broadcasters Engineering Handbook: NAB Engineering Handbook giving you information deeper including different ways, you can find any publication out there but there is no publication that similar with National Association of Broadcasters Engineering Handbook: NAB Engineering Handbook. It gives you thrill looking at journey, its open up your personal eyes about the thing this happened in the world which is might be can be happened around you. It is possible to bring everywhere like in park, café, or even in your method home by train. If you are having difficulties in bringing the printed book maybe the form of National Association of Broadcasters Engineering Handbook: NAB Engineering Handbook in e-book can be your option.

Carlos Callahan:

A lot of people always spent all their free time to vacation or even go to the outside with them friends and family or their friend. Did you know? Many a lot of people spent they free time just watching TV, or maybe playing video games all day long. If you want to try to find a new activity that is look different you can read any book. It is really fun for yourself. If you enjoy the book that you read you can spent the whole day to reading a publication. The book National Association of Broadcasters Engineering Handbook: NAB Engineering Handbook it is very good to read. There are a lot of individuals who recommended this book. These folks were enjoying reading this book. When you did not have enough space to bring this book you can buy often the e-book. You can m0ore quickly to read this book out of your smart phone. The price is not too expensive but this book features high quality.

Omar Hinojosa:

Playing with family inside a park, coming to see the sea world or hanging out with pals is thing that usually you have done when you have spare time, in that case why you don't try thing that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love National Association of Broadcasters Engineering Handbook: NAB Engineering Handbook, you are able to enjoy both. It is very good combination right, you still wish to miss it? What kind of hang type is it? Oh seriously its mind hangout folks. What? Still don't buy it, oh come on its referred to as reading friends.

Denise Swann:

Are you kind of occupied person, only have 10 or perhaps 15 minute in your moment to upgrading your mind talent or thinking skill perhaps analytical thinking? Then you are experiencing problem with the book as compared to can satisfy your small amount of time to read it because all this time you only find publication that need more time to be read. National Association of Broadcasters Engineering Handbook: NAB Engineering Handbook can be your answer as it can be read by anyone who have those short free time problems.
