On a Beam of Light: A Story of Albert Einstein By Jennifer Berne

A boy rides a bicycle down a dusty road. But in his mind, he envisions himself traveling at a speed beyond imagining, on a beam of light. This brilliant mind will one day offer up some of the most revolutionary ideas ever conceived. From a boy endlessly fascinated by the wonders around him, Albert Einstein ultimately grows into a man of genius recognized the world over for profoundly illuminating our understanding of the universe. Jennifer Berne and Vladimir Radunsky invite the reader to travel along with Einstein on a journey full of curiosity, laughter, and scientific discovery. Parents and children alike will appreciate this moving story of the powerful difference imagination can make in any life.

Editorial Review

From [Booklist](#)

Starred Review It's not easy to explain the work of Albert Einstein to a young audience, but this marvelous book pulls it off. It does so by providing an overview of Einstein's life: the way he thought and how his remarkable ideas changed the way scientists think. Berne begins with baby Albert, who didn't say a word. And as he got older, he didn't say a word—but he looked and wondered. When he was a student, his teachers thought he was too different, but his differences led him to think about natural phenomenon like light and numbers in new ways. The book reroutes the text around events in Einstein's life, such as his escape from Nazi Germany and his move to the U.S., and it only touches upon his work on the nuclear bomb. This is a more personal look, but still, it explains how he came to the discovery of atoms and his theories about the speed of light. The text could not have better support than Radunsky's artwork. Executed on textured papers, the stylized watercolors outlined in ink sometimes eschew decoration, with the focus on Einstein and others in his life; other spreads are swirled with words and numbers. The book stresses that readers may someday answer the questions that Einstein didn't get to, and an author's note extends the text with paragraphs about Einstein's pacifism, personality, and thought experiments. A book as special as its subject. Grades 1-3. --Ilene Cooper
