A Theory of Craft: Function and Aesthetic Expression By Howard Risatti

What is craft? How is it different from fine art or design? In *A Theory of Craft*, Howard Risatti examines these issues by comparing handmade ceramics, glass, metalwork, weaving, and furniture to painting, sculpture, photography, and machine-made design from Bauhaus to the Memphis Group. He describes craft as uniquely blending function with a deeper expression of human values that transcend culture, time, and space. Craft must articulate a role for itself in contemporary society, says Risatti; otherwise it will be absorbed by fine art or design, and its singular approach to understanding the world will be lost.

Review

An unprecedented effort to define crafts and to place the work in a cultural context, both differentiating it from and aligning it with other aesthetic activities. Risatti's fluent, knowledgeable approach and his emphatic categorizing should be widely read--not because he offers a final answer but because his extraordinary book is so stimulating and provocative.--Janet Koplos, senior editor, *Art in America*

Risatti challenges many of the long-held stereotypes about craft that hinder a true understanding of the art form. His conclusions challenge us to reevaluate our ideas not only about craft but also about what actually constitutes a work of art.--Kenneth R. Trapp, from the Foreword

This book is notable for its logically progressive and rigorously philosophical development of a general theory of craft. In arguing his case, Risatti draws upon an extensive knowledge of aesthetics. *A Theory of Craft* sets an excellent precedent for future research in the field.--Glen R. Brown, Kansas State University
